

Chuck Hull

Inventor of the 3D Printer

CSA CELEBRITY SPEAKERS

Chuck Hull is known as the inventor of 3D printing. He is the Co-Founder, Executive Vice President and Chief Technology Officer of 3D Systems. He continues to lead the 3D printing revolution as 3D Systems' Chief Technology Officer, celebrating 30 years of continuous 3D printing innovation and presiding over 7 different 3D print technologies, over 100 materials and 1,200 patents. In 2014 he was inducted into the American National Inventors Hall of Fame.

In detail

Chuck has a BS in engineering physics from University of Colorado, USA and an honorary doctorate in engineering from Loughborough University, UK. He was working at the manufacturer Ultra Violet Products where he helped develop the company's ultraviolet-light curable resins, which were used to add protective coatings to furniture and other surfaces. Chuck began experimenting with laying down numerous coats of the resin to make plastic models and thus 3D printing was born. In 1983 he created the first 3D printer and has been refining it ever since.

What he offers you

Chuck Hull is a pioneering innovator and the man responsible for a breakthrough that is now driving forward the world of manufacturing. In his presentations he discusses his early technical and commercial challenges and what it took to become successful. He also explains where his invention has taken industry today and what it means for the future.

How he presents

His charisma and knowledge make Chuck Hall a sought after speaker at conferences around the globe.

Languages

He presents in English.
